## **Innovative Solutions for Leisure Sailing**

Fleetne

**Have you been frustrated trying to use your mobile phone at sea? Always dropping signal or a slow data connection?**

Perhaps you've ended up roaming onto a foreign network and been greeted with a large mobile phone bill on your return? Sometimes you just want to check into the office or oversee some business whilst you take an extended trip away. Or perhaps the kids complaining on holiday they can't access their social media and talk to their friends drives you crazy? But yet the thought of satellite communications seems too complicated?

This is about to change as there is now an affordable solution to your communications problems through Inmarsat satellites to your boat.

### **Seasonal Flexibility**

Fleet One has been designed to allow the seasonal flexibility you require at a price you can afford.

The compact antenna, can be quickly and easily installed and mounted onto small motorboats and sailing yachts alike, and weighs only 2.5kg.

You can now be connected to the internet and on phone, as though you are at home. You can connect your smart phones and tablets via an optional WiFi router to access apps, and can keep up with the news and sports results whilst you are away. It will also provide vital help assisting with route planning and navigation through weather and chart updates. What's more it provides peace of mind knowing you can connect to land anytime.

Fleet One operates on Inmarsat's I-4 satellites which are rigorously tested and proven as the go-to choice for ships and crew around the world.

### **Safety Services**

Fleet One supports Inmarsat's unique '505' safety service, which in an emergency routes you directly to a MRCC. This means that in one phone call you can alert the safety services of your position and nature of distress, by reassuringly speaking to the Search and Rescue Services knowing that assistance will be sent.

### **Global Coverage**

Fleet One has full global coverage with low cost preferential regions to benefit key coastal regions and keep costs down.

### **Enabling Connectivity**

Fleet One gives a very cost effective and competitive pricing for sailors and leisure users to access the internet, write emails and make phone calls. Fleet One has a standard "plug and play" Ethernet connection to a computer, and can support smart phones, tablets and computers via an additional wireless router, allowing access to specific maritime applications. A wireless router would allow multiple people to access the internet and email at the same time.

### **Unrivalled Reliability**

You can depend on Inmarsat, whatever the weather. We provide the most robust communications links, with average network availability greater than any mobile phone provider and exceeding 99.9%. Fleet One terminals are specifically designed for use within the maritime environment.

The terminals have been tested and approved to Inmarsat's exacting standards.

## Fleet One Terminal

	Antenna
	from
Diameter	27.5 cm
Height	22.1 cm
Weight	2.5 kg

## Fleet One Technical

	Fleet
Data Standard IP	Up to 100kbps
Voice	4kbps AMBE+2
SMS	Standard 3G (up to 160 characters)

The Fleet One service is offered with two different terminal options. Both are stabilised directional antennae and provide the same service and are approved to Inmarsat and IEC Standards.

## Applications

Fleet One supports an extensive range of applications:

## Easy Installation

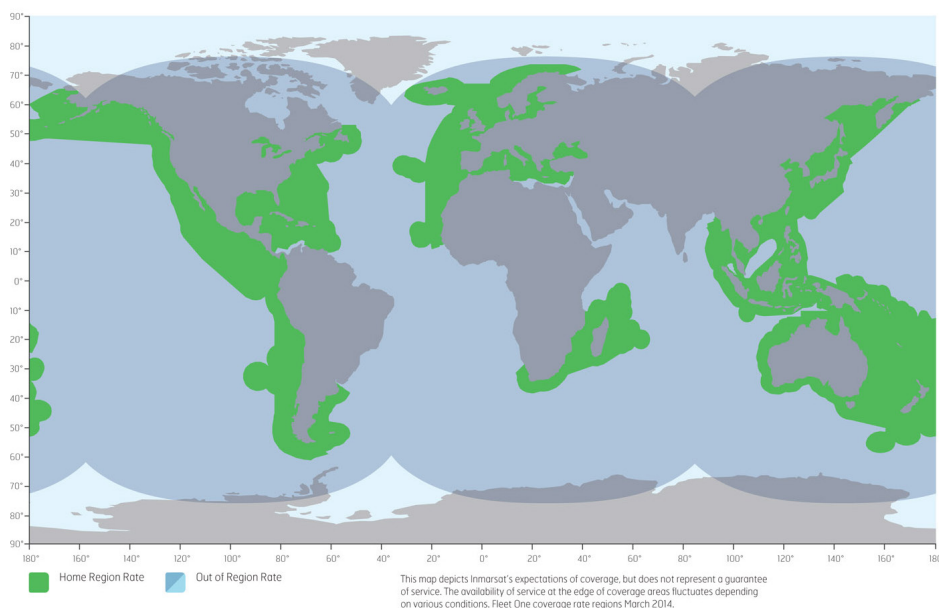

Fleet One can be quickly and easily installed and set up on your boat. Terminals operate globally and standardised user interfaces are used with all manufacturers.

## Fleet One Coverage

Fleet One is supported by Inmarsat's global coverage and capability, ensuring you are never out of touch wherever you are. What's more Fleet One is designed for recreational boats and sailors, and offers specialist areas that have been highlighted as key hubs.

## How to buy Fleet One

Fleet One is available from Inmarsat and our service providers around the world. Visit our website to find the right choice for your company.

## Cost Effective

With Fleet One you can have performance with flexibility at an affordable price. Terminal costs are competitive, with a choice of airtime pricing to suit your needs. You don't have to commit to a lengthy contract and there is ability to suspend whilst the boat is winterised. Alternatively competitive rates are available on a pre-paid voucher with no commitment required. It makes global voice and data easily accessible to meet sailor's communications needs.
