

# SAILOR 150 FleetBroadband

## **Quick Guide**

#### Make a voice call

To make a call from your SAILOR FleetBroadband terminal, dial

## 00 <country code> <phone number> #

Example: Cobham SATCOM in Denmark:

#### 00 45 39558800 #

**Note**: There are two audio qualities for voice: Standard voice and 3.1 kHz Audio. The default audio quality is Standard voice.

To force the call to use Standard voice, dial 1 \* before the number.

To force the call to use 3.1 kHz Audio, dial 2 \* before the number

To make a call **to** the terminal, dial

## +<mobile number>

**Note**: There are two mobile numbers for voice, one for 3.1 kHz Audio and one for Standard voice.

#### Send a fax

To send a fax from the terminal, dial

#### 00 <country code> <phone number> #

Example: Cobham SATCOM in Denmark:

#### 00 45 39558888 #

**Note**: For an analog fax, the audio quality must be set to 3.1 kHz Audio.

To force 3.1 kHz Audio, dial **2** \* before the number

To send a fax to the terminal, dial

### +<3.1 kHz Audio mobile number>

Alternatively you can send a fax directly from your PC using an electronic fax application.

#### Make a local call

To make local calls between phones connected to the same terminal. do as follows:

- For a local call to an IP handset, dial the number of the IP handset (e.g. **0501**) followed by # or .
- For a local call to an analog phone, dial 0301 followed by # or .

For information on allocation of local numbers, refer to the User Manual.

#### **Access the Internet**

To access the Internet do as follows:

- 1. Connect the LAN cable between your computer and the FleetBroadband terminal.
- 2. Start up your computer.
- 3. Open your browser.

If your data connection is automatically enabled, you should now have access to the Internet. If not, you must start a connection as described in the next section.

## Start/stop data sessions on LAN.

You can start and stop data sessions with a connected IP Handset (master handset, local no. 0501) or with the terminal's built-in web interface

**IP handset**: To start or stop data sessions with the IP handset, do as follows:

- 1. From the BGAN menu, select **Connect**.
- Use the left/right keys to find the network user group for the application you want to start or stop.
- Use the up/down keys to select the connection you wish to start (Active) or stop (Inactive).
- 4. Select **Start** to start a connection or select **Stop** to stop a connection.

**Web interface**: Using a connected computer you can also start or stop data sessions from the Dashboard of the terminal's built-in web interface.

To access the web interface, open your browser and enter the IP address of your FleetBroadband terminal. The default IP address is **192.168.0.1**.

To start data sessions from the Dashboard, click the **Start Standard** link under **PROFILES ON LAN**.

For further information, refer to the SAILOR 150 FleetBroadband User manual.
