

Thuraya Handheld XT portable phones

Thuraya handheld services provide easy to use, reliable and cost-efficient satellite communications to over 160 countries around the world, encompassing Asia, Africa, Australia, the Middle East and Europe.

The smallest and lightest satellite phones, Thuraya handsets are compact enough to slip into your pocket. They are an ideal solution for professionals on the move such as government and military personnel, journalists, oil, gas or mining teams, NGO personnel and anyone working in remotely locations with limited access to traditional terrestrial connectivity.

Choose the Thuraya XT handset for you

The Thuraya handheld services are available with several distinct handsets: Thuraya XT-PRO and Thuraya XT-LITE for a good choice of price and performance.

▶ Thuraya XT-LITE

With the new Thuraya XT-LITE, voice satellite communications have never been this easy and competitively priced. This entry-level, reliable and affordable voice-only satellite mobile is designed for cost-conscious users to stay securely connected in remote areas.

▶ Thuraya XT-PRO

For demanding users, Thuraya XT-PRO offers more durability and advanced features such as fax and data up to 60 kbps. Certified with an IP55 durability rating, the phone is water resistant, dust and shockproof. Ideally suited for use in rugged environments, it enables voice, messaging, data and fax. It is the first satellite phone with built-in GPS, Beidou and Glonass capability for highest flexibility in all regions.

Business Applications

Thuraya XT-Pro enable you to make phone calls but also to browse the web, send and receive emails, and use GPS waypoint navigation with tracking capabilities; offers the fastest data speed of any satellite handheld phone in the market. It comes with two data services: the standard data up to 9.6 kbps and the unique GmPRS (Geo mobile Packet Radio Service) option providing data up to 60 kbps. Thuraya XT-PRO GmPRS-enabled handsets open access to bandwidth-hungry applications such as content downloading, FTP, VPN, E-commerce.

FDU-XT

The FDU-XT is a home and office docking adapter that allows you to use the Thuraya XT phones in an indoor setting. Simply connect the FDU-XT with the antennas; then dock your Thuraya XT Lite or XT-PRO handset into the cradle and start to enjoying satellite phone connectivity. Easy to install and operate, it supports Voice, Data and Fax transmission and comes with SAT and GPS antennas with 25m cables to ensure seamless connectivity.

Thuraya XT- PRO most advanced satellite phone

The world's most compact and highly featured satellite phone

Small enough to easily fit in your pocket, the Thuraya XT-PRO is jet water and dust resistant as well as shock proof to withstand harsh environments.

Designed for professional users, Thuraya XT-PRO is the world's most advanced satellite phone which is ruggedized and equipped with long battery life, ensuring connectivity no matter where you go.

Dedicated SOS button

The XT-PRO has a dedicated SOS button which is easy to use in times of distress. Even when the phone is switched off, simply press and hold the SOS button for 3 seconds. This starts the phone and triggers the emergency service (call and/or SMS) to any pre-programmed number.

Global Navigation Satellite system

For the first time on a satellite phone, you can select your preferred navigation system and choose between GPS, BeiDou and Glonass for highest flexibility wherever you may go.

Easy, fast and reliable internet connectivity

The satellite phone's GmPRS capabilities enables you to easily send or receive emails and browse the web with your laptop or PC — from virtually anywhere. Thuraya XT-PRO features the industry's fastest data speeds of up to 60 Kbps.

Dependable battery life

Thuraya XT-PRO's durable battery provides you with up to 9 hours of talk-time and 100 hours of standby time. This is currently the longest talk-time available on a satellite phone so if you spend a lot of time talking this provides an ideal solution.

Supported by an extensive and reliable satellite network

Supported by Thuraya's superb satellite network that covers two-thirds of the globe, you will always be in touch. The Thuraya XT-PRO also enables you to receive a call notification even if your satellite signal is too weak to receive the call itself. This is particularly useful when the Thuraya XT-PRO is in your pocket with the antenna stowed, keeping you connected at all times.

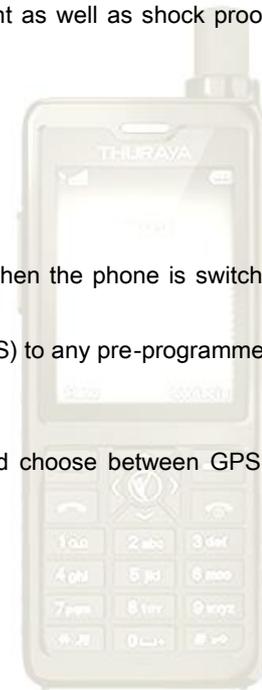

Glare resistant Gorilla® glass display

Toughened glass for harsh conditions and customized outdoor display for easy readability in direct sunlight, no matter how bright the conditions are.

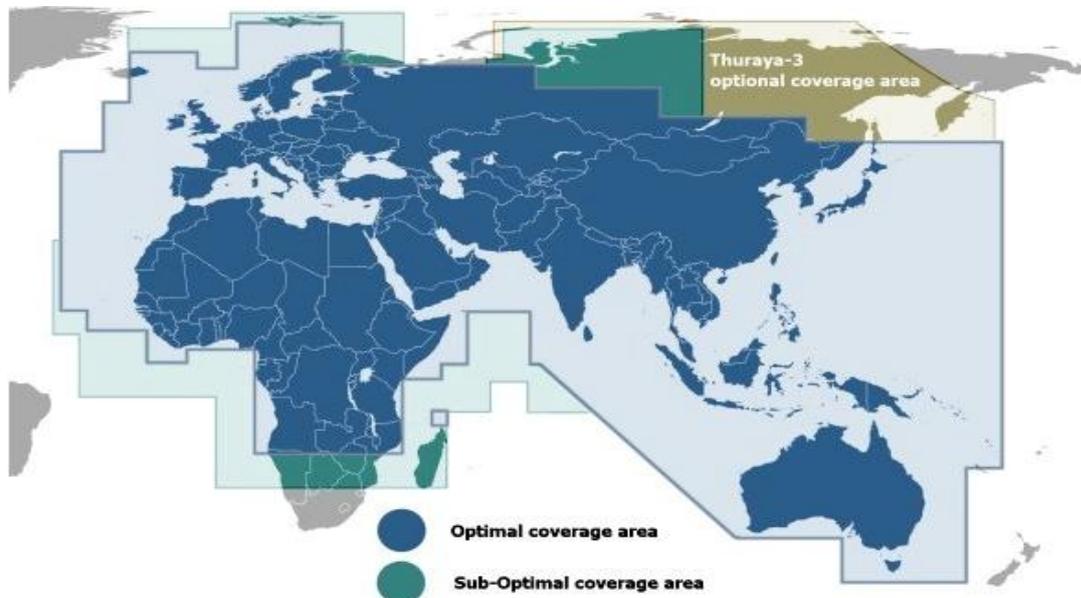

Data GmPRS provides high compression rates

The Thuraya XT-PRO can also be used to access emails and browse the Internet via a satellite data connection (GmPRS). There are 3 different APNs available, allowing you to choose the settings which are the most convenient for you. These available APN-names are: 'GET' (standard APN with no compression), 'GETLC' (low compression, images are being compressed), and 'GETHC' (high compression, images will not be downloaded to reduce website loading time).

The Thuraya XT-LITE/PRO can be used with a GSM SIM-card in satellite roaming mode if the GSM operator has a roaming agreement with Thuraya. Please check with your local GSM SIM-card provider for the latest roaming charges.

Thuraya Indoor Repeaters – Multi Channel: are compact and cost effective solutions to provide Thuraya network coverage in indoor environment. It can handle up to 10 call or session at a time.

SatDocker for XT-PRO: SAT-DOCKER: ensures quality Thuraya satellite service in all types of vehicles. This easy-to-install and reliable docking to use all Thuraya features, provides charging to the battery, the 3-in-1 external vehicle antenna and a phone cradle.

SAT-VDA Hands-Free Car Kit for XT is a premium vehicle kit for Thuraya. SAT-VDA ensures uninterrupted satellite service while using the XT in vehicles. Due to the nature of satellite signal, requiring direct view of the satellite, SAT-VDA significantly increases reliability of the satellite service for in-vehicle use. Hands-free features let you drive in comfort and safety while using your XT.

Silicon Cover Case: Customized silicon cover case for that additional layer of protection.

Headset for Thuraya XT: High quality headset for with 3.5mm jack lets you use it as handsfree.

Thuraya Service from Universat

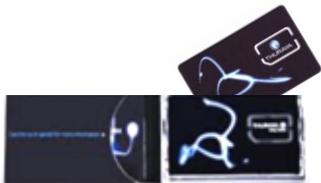

Which Thuraya Plan is Best For You?

Prepaid Plans protect your budget by assuring that you never pay for more service than you expect or purchase. You can purchase reload vouchers for your prepaid account. We offer more types of prepaid service, e. g.: NOVA Plus prepaid plans have optimized rates for Zone E countries. Our regular prepaid plans are generally the better choice for clients operating outside of Zone E. Both prepaid plans offer voice mail, 9.6 kbps data, SMS messaging, fax capability, and GmPRS always-on internet. If your Thuraya satellite phone has GSM cellular capability, it will only be able to receive inbound GSM cellular calls on a prepaid plan. Outbound cellular-mode calls, call detail records, and SkyFile email service are not available on our Thuraya prepaid plans.

Postpaid Plans have a monthly fee and include a detailed monthly bill with call records. Another important benefit is that a postpaid plan lets you use as many minutes as you need -- which can be critical in an emergency. Most government and corporate clients choose postpaid service for this reason. See the service agreement for complete terms and conditions.

Postpaid Plans have a monthly fee and include a detailed monthly bill with call records. Value Added Services

Thuraya Short Code Services: Thuraya Short Codes are special short telephone numbers that are designed to be easier to read and remember. Short codes are associated with value-added services such voicemail, call-me back and other Thuraya mobile and Customer Care services.

Thuraya Short Code Services: Thuraya Short Codes are special short telephone numbers that are designed to be easier to read and remember. Short codes are associated with value-added services such voicemail, call-me back and other Thuraya mobile and Customer Care services.

Twitter SMS Service on Thuraya Handsets: Send and receive tweets via SMS wherever you may be located within Thuraya's satellite coverage area, to and from your Thuraya handheld devices. For more information on how to add your Thuraya phone to your Twitter account or how to sign up via SMS.

Free Web-SMS: Access the Universat web-SMS platform from your computer and start sending messages to Thuraya phones free of charge!

Direct Dial Up Internet Access: Gain access to the Internet via our dual mode handsets, anytime and anywhere within our coverage area, without paying an additional subscription fee. This service is available for Thuraya Prepay and Postpay customers, as well as GSM subscribers roaming onto the Thuraya network.

Thuraya Call Me Back: Stay connected even if you have no remaining Thuraya airtime credit. Using this service, you can send SMS messages to other handsets using Short Code 1755, requesting a call back.

Thuraya Missed Call & Voice Mail Services: Make sure that you don't miss a call: even if your Thuraya handset is switched off, you are outside the Thuraya coverage area or on another call. Thuraya Missed Call Service automatically sends an SMS advising of a missed call and lists the time of the call and the telephone number; Thuraya Voice Mail Service allows the caller to leave a voice mail.

Thuraya Test Call Service: Your satellite phone needs to be in optimal working condition when you need it. Dial 11 11 2 to test your Thuraya phone.

SMS to Email: Send SMS messages anytime via email, without needing a PC, modem connection or internet subscription. With a simple process that requires no special activation, you can send these via a Thuraya handset while outdoors, travelling in a vehicle or using a Thuraya Indoor Enabler.
